

Cramer Fugi Kit - Professional profiles only in 3 steps:

Remove old caulking with saw blade. Whatever is left on tiles or other smooth surfaces can be removed with the scraping blade.

Apply the caulking mass. Since there is no need for a releasing agent, just work step-by-step, by only doing short distances.

Choose caulking line shape. Make sure both edges touch both surfaces

Slightly press FUGI and pull.

If necessary, use FUGI II with guiding aid to assist you in crossing grout joints.
