

Classic Line controls

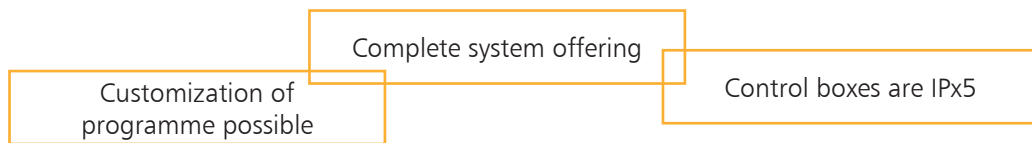

Electronics

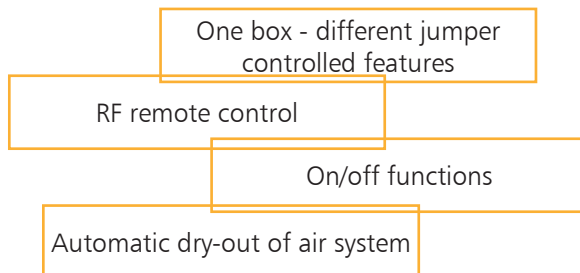

Design the system you want

HydroAir International's new line of Classic Line control boxes gives you numerous installation possibilities.

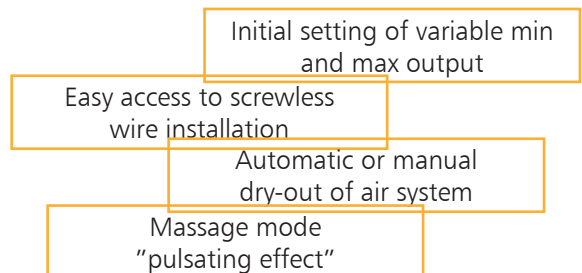

Use all control boxes with a combination of touches and LED buttons - the possibilities are almost endless.

Classic Line on/off

Classic Line variable

Classic Line controls

Classic Line on/off

20-0241 - 1 function on/off
Use the box as a standard 1 function on/off or for water inlet or water level control.

20-0242 - 2 functions on/off
Setting of automatic dry-out of air system is possible. Furthermore by installing a special PIC, you can control 2 functions with only 1 function touch/LED button.

20-0243 / 20-0244 - 3 and 4 functions on/off with RF module for remote control
Both control boxes have integrated RF module for remote control. Setting of automatic dry-out of air system is possible.

Classic Line variable

20-0312 / 20-0313 - 2 functions on/off plus 1 variable function
Use our 3 function control box to install e.g. a pump, a light and the blower as a variable function.

20-0314 - 3 functions on/off plus 1 variable function and heater outlet - designed for customization
The 4 function control box can be used in the same manner as the 3 function control box. However, you now have 1 extra outlet which can be used for e.g. regulation of the venturi via a solenoid valve (instead of an air control), water inlet or any other feature you prefer on your system.

Options

You can use the following options with our Classic Line controls

Round touches

RF remote control

*only for Classic Line on/off
