

StringLIGHT

LED SPA LIGHTING SYSTEM

6 Brilliant Colors and 4 Color Transition Programs

Solid colors: Red, Blue, Green, Orange, White, Purple

Tidal Fade - Cool color mix; slow transitions between green and blue tones

• Afterburner Fade - Warm color mix; slow transitions between red and orange tones

• Spectrum Slowdance - slow transitions between all six colors

• Color Burst - fast strobe through all six colors

THE ALL NEW StringLIGHT Lighting System

StringLIGHT lighting systems integrate into spas, fountains, waterfalls and water features to provide spectacular water color saturation with multiple lighting modes. This fully customizable, multi-color LED lighting system offers six solid colors and four light shows. StringLIGHT features the brightest, high powered, wide angle LEDs on the market to provide smooth color transitions and light uniformity.

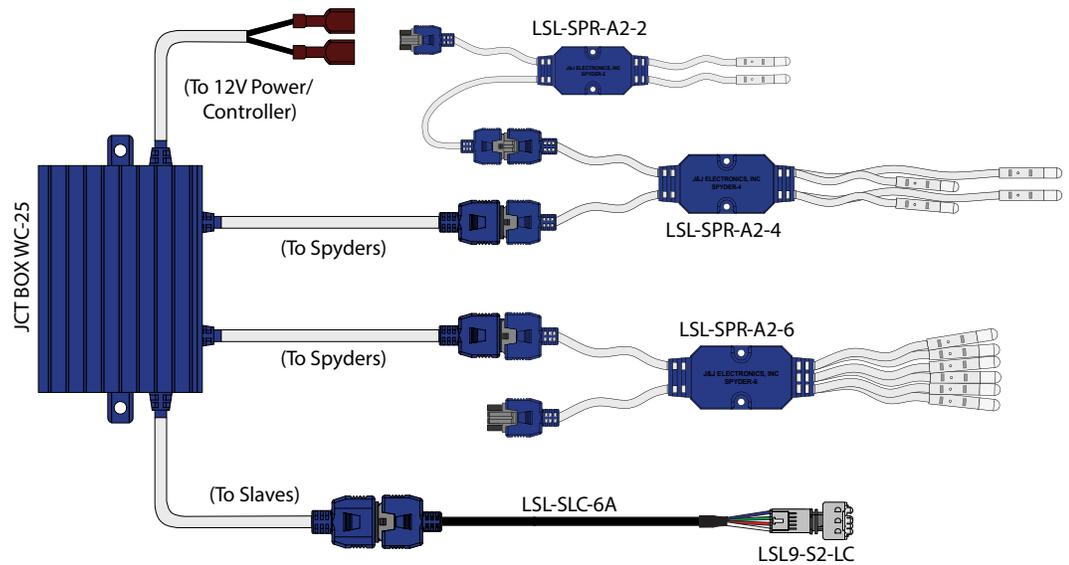

StringLIGHT is pre-programmed with six solid colors and four light shows. Light show and solid color selection works using existing lighting controls for simple system integration during manufacturing and easy end user control. All lights in the system automatically synchronize to produce a highly personalized lighting experience.

Features

- Modular components offer limitless system configurations
- Choice of controllers to support up to 100 points of light
- Smooth color transitions and light uniformity
- Works with existing power supplies and lighting controls*
- Low voltage 12V AC/DC system

* ColorCHOICE is not designed to operate in spas equipped with dimming systems.

Sample Configuration.
