

# IMPORTANT CUSTOMER NOTICE

\* Please read this before installing and using your Certikin Swimming Pool Ladder \*

- Your ladder should be cleaned regularly to prevent any corrosion (detailed cleaning recommendations are available from your local Certikin stockist).
- All fixings on your ladder should be checked regularly to ensure they are fully tightened. This is to maximise the overall structural strength. **Pay special attention to the fixing bolts and nuts used to attach the treads to the rails.**
- This ladder is designed for use on domestic swimming pools - it is **not** suitable for use on commercial swimming pools: leisure centres, school pools, hotel pools, etc. Heavier duty ladders with steel treads are available from your local Certikin stockist.
- The Certikin ladder is designed only for access in and out of your swimming pool. It should not be used as a diving stage, nor for use as a climbing frame. Please take great care when using this ladder.
- All Certikin ladders are designed for the use of **one person only** at a time. Please ensure that no more than one person is ever using the ladder at an one time.
