

BO₃ SPA OZONE GENERATOR

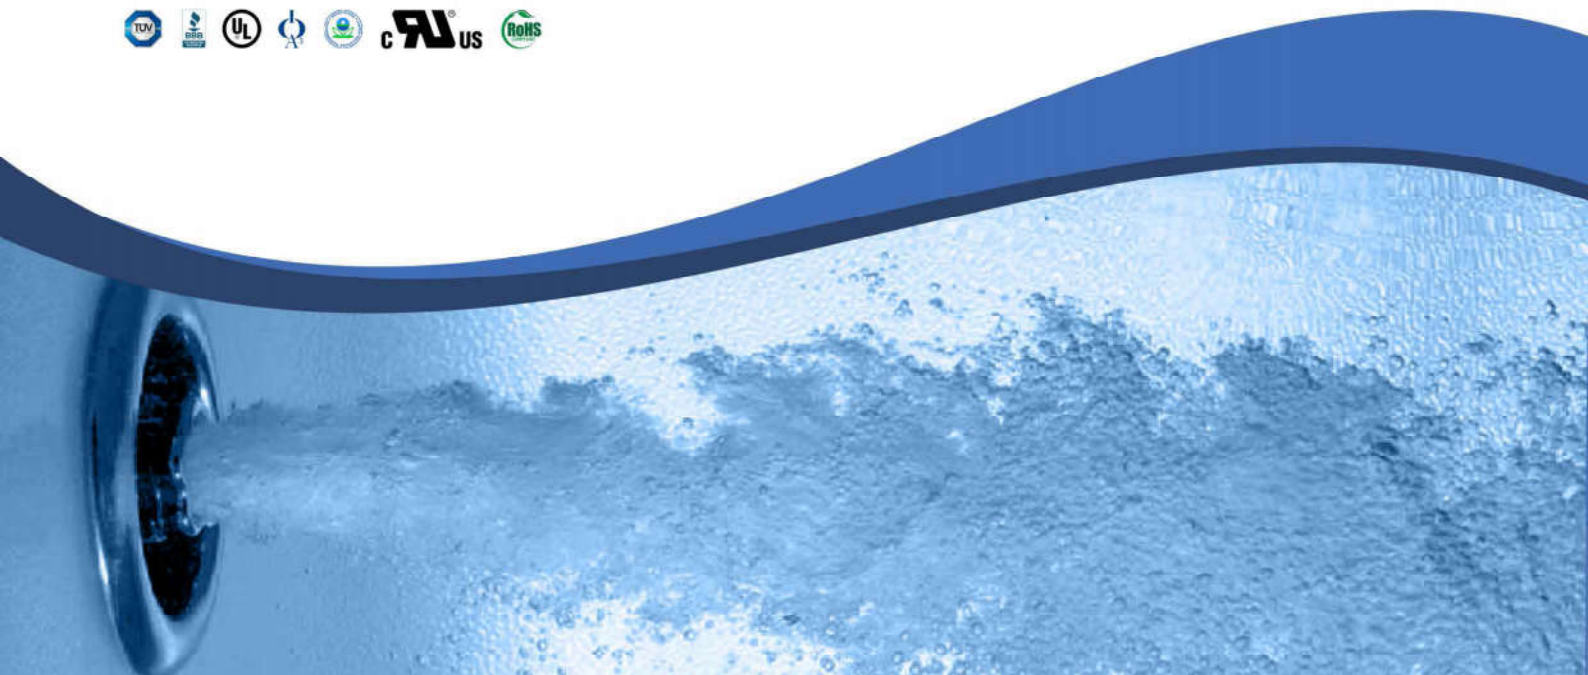

ANYTHING LESS IS EVERYTHING ELSE

SPECIFICATIONS

- POWER INPUT: 240V 50/60HZ
- ENCLOSURE: ABS PLASTIC/PA-765A
- DIMENSIONS: 2.6"(L) 3.3"(W) 1.3" (D)
- WEIGHT: 0.6 LBS
- POTTED ELECTRONICS FOR HEAT DISTRIBUTION AND WATER RESISTANCE
- AIR INLET: FILTERED AMBIENT AIR RESTRICTOR
- OUTLET: 1/4" CHECK VALVE FITTING
- OZONE OUTPUT: 50 MG/HR. HIGHER OUTPUT ADJUSTABLE
- AVAILABLE IN MULTIPLE PLUG CONFIGURATIONS

ACTUAL SIZE

O₃ SERIES SPA OZONE GENERATORS

ANYTHING LESS IS EVERYTHING ELSE

Use more oxygen and less chlorine to keep your spa safe and clean.

Natural ozone from the **BO₃** continuously "scrubs" the water clean of bacteria and viruses.

- ☺ Ozone costs less than a dollar per month and reduces your chlorine needs by up to 90%.
- ☺ Ozone is simply activated oxygen, produced in nature by sunlight, and electronically in your spa.
- ☺ Ozone is more powerful than chlorine, without the unpleasant side effects.
- ☺ The **BO₃** operates automatically so there is nothing for you to measure or add to the spa water.
- ☺ Ozone works great with mineral ions or salt water - two layers of protection!

Using ozone is the biggest step you can take toward a low maintenance spa, and it's the least expensive!

Install it now and enjoy years of safe trouble-free water.

FREQUENTLY ASKED QUESTIONS

What is ozone?

Ozone is simply activated oxygen. It's produced in nature by sunlight and lightning. It has a very short life. As it breaks down to regular oxygen (oxidizes) it kills harmful bacteria and viruses instantly.

Is using ozone to sanitize a new idea?

Ozone has been used for over 100 years to purify drinking water. The fact that it is stronger than chemicals makes it widely used for food sanitization and water purification. Ozone has been used on millions of spas for over 30 years for the same reasons.

How do I use an ozone generator?

The ozone generator is a silent friend. It works automatically every time your spa pump is on. It is silent, uses a tiny amount of electricity, requires virtually no maintenance and lasts for up to 5 years without replacement. It only costs pennies a month to operate. Over the last 20 years more than half of the spas manufactured have an ozone generator. You may have heard the catchy saying "Set it and forget it." That is how you use an ozone generator.

If I use an ozone generator, does that mean I never have to use any chemicals?

No, not quite. You do need to keep a small amount of chlorine or minerals in your water since ozone turns to oxygen in a few minutes. Ozone is a thousand times more powerful than chlorine, so it handles the bulk of the sanitizing and a small amount of chlorine or minerals will do the rest. You do need to keep your water balanced. Ozone has no effect on pH whatsoever. And guess what? Ozone kills nasty parasites that are resistant to chlorine!

What if I use Nature2 or other mineral ionizers?

Using ozone with a mineral ionizer or salt water is an ideal condition. It provides two layers of protection. In normal spa use combining an ozonator with minerals can allow you to use almost no chlorine at all. Simply shock the water regularly and keep the pH and alkalinity balanced.

Why is Aqua Sun spa ozone generator the best choice for my spa?

There are less expensive ozone generators available. Aqua Sun only uses Corona Discharge (CD) technology to generate ozone. Other brands use a UV bulb, which is low output and only last a year or so then must be replaced. Aqua Sun ozone generators are built tough. They cannot be damaged by water or heat and last up to 5 years. We have a two year warranty.
