

Blue Horizons Algae Controller

Key Features/Characteristics

- 🔑 Copper free algaecide
- 🔑 Use for regular algae prevention
- 🔑 Part of the **BOAST** System

Application Instructions

1. Maintain pH level within the ideal range of 7.2 – 7.6. If not in this range, adjust.
2. Check the chlorine level and ensure it is established within the ideal range 1 – 3mg/l (ppm);
3. Gradually pour the solution into the pool, whilst the pump(s) are turned ‘on’ preferably near the water inlets to aid distribution.
4. After the initial dose this product should be applied once a week to prevent algae formation.

Dose Rates			
Water Volumes		Initial Dose	Weekly Dose
Litres	Gallons		
4,545	1,000	50ml	25ml
11,360	2,500	125ml	63ml
22,700	5,000	250ml	125ml
45,450	10,000	500ml	250ml
68,175	15,000	750ml	375ml
