

PURE-SPA

Spa Super Cleanse - Biofilm Eliminator Tablet for Spas & Hot Tubs

100 times more effective in the removal of biofilm than Chlorine

Each sachet contains 1 x 20g tablet

Removes Biofilm & pathogens from all surfaces & hard to reach areas of pipework and within spas.

How does it work?

Warm hot tub water can provide the ideal breeding ground for bacterial growth.

As this begins to attach to spa pipework and surfaces, biofilm can begin to form.

Biofilm is extremely resistant against chlorine and can harbour bacteria and other pathogens.

Pure-Spa Power Tabs are a highly effective cleansing agent that penetrates the biofilm and helps remove bacteria. Each tablet generates a Chlorine Dioxide soluble gas with the advantage that it penetrates through the biofilm and removes it. Chlorine can't do that because chlorine must oxidize through the biofilm first. *Pure-Spa Power tab* is about 100 times more effective in the removal of biofilm than chlorine.

Not recommended for use in inflatable Spas.

Application Instructions – Hot Tubs/Spas

Apply 1 tablet per 500 - 1,000 litres of spa water prior to draining (domestic).

Apply 2 tablets for larger spas of 1000L litres or more of spa water prior to draining (domestic).

Do not use in enclosed spaces, make sure there is good ventilation!

1. Remove and thoroughly clean cartridge filters before returning to service.
 2. Ensure free chlorine or total bromine levels are within the recommended range of 3 - 5mg/l (ppm).
 3. Only use Pure-Spa Power Tabs prior to draining down your hot tub.
 4. **Caution:** Do not use hot tub during treatment.
 5. Remove any soft head rests that may be fitted.
 6. Isolate any chlorine or bromine feeder prior to Pure-Spa Power Tab treatment.
 7. Refer to the below table for the correct dosage requirements.
 8. Wear protective gloves and eye protection when handling the product.
 9. **DO NOT** touch tablets or allow them to get wet prior to adding to the hot tub water.
 10. Leave the deep clean treatment for 60 minutes with the pump(s) running.
- After treatment, turn the pump(s) off and drain all the water to waste.
11. Refill with fresh water and return hot tub water to recommended chemical levels.

Spa Super Cleanse Tablet 20g each - **UN1479** Contains Sodium Chlorite & Sodium Hydrogen Sulphate

Warning: Dosage/Storage

Any remaining un-opened sachets should be stored in a sealed water tight container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials and food and drink. Separate from reducing agents and combustible materials. Keep container tightly closed and sealed until ready for use. Handle product in a well ventilated area, preferably outdoors. Ensure lid is replaced after use. Ensure chemicals do not become damp in storage. Wash hands after use

Danger:

May Intensify fire; Oxidiser. May be corrosive to metals

Harmful in contact with skin, causes severe skin burns and eye damage

May cause respiratory irritation. Toxic to aquatic organisms with long lasting effects

Keep out of reach of children

Keep away from heat, hot surfaces, sparks, open flames and other ignition sources – NO SMOKING

Take any precaution to avoid mixing with with combustible/other chemicals.

Wear protective gloves/Protective clothing/eye protection/face protection

Call a POISON CENTRE or doctor if you feel unwell

IF SWALLOWED: Rinse mouth. DO NOT induce vomiting

IF ON SKIN (or hair) Remove/take off immediately all contaminated clothing. Rinse skin with water/shower

IF IN EYES: Rinse cautiously with water for several minutes

Remove contact lenses, if present and easy to do so. Continue rinsing. Contact with acid liberates very toxic gas

Hazard symbols:

Signal word: Danger

Hazard statements:

H272 May intensify fire; oxidiser
H302+H312+H332 Harmful if swallowed, in contact with skin or if inhaled.
H318 Causes serious eye damage.
H373 May cause damage to organs through prolonged or repeated exposure.

P220 Keep/Store away from clothing/combustible materials.
P280 Wear protective gloves/protective clothing/eye protection/face protection.
P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P310 Immediately call a POISON CENTER/doctor.

Special labelling of certain mixtures

EUH029 Contact with water liberates toxic gas.
EUH031 Contact with acids liberates toxic gas.

Septic Tanks

Care should be taken when draining the solution to a septic tank
