

Blue Horizons Solar Shield

Key Features/Characteristics

- 🔑 Liquid pool blanket
- 🔑 Reduces evaporation and heat loss
- 🔑 Compatible with all sanitisers
- 🔑 Lasts up to one month

Blue Horizons Solar Shield minimises heat loss by forming a harmless, ultra-thin, invisible barrier on the water's surface to reduce evaporation.

Application Instructions

1. Shake bottle well before use.
2. Dose the required amount of Solar Shield whilst the pumps are turned 'on' to assist product distribution. Run the pumps for at least an hour after application to allow the invisible pool blanket to form on the surface.
3. In cold water below 18°C (65°F), some harmless residue/cloudiness may be created that should disappear within 24 hours.

Dose Rates		
Litres	Gallons	Monthly treatment routine
4,546	1,000	15ml
11,365	2,500	35ml
22,730	5,000	75ml
45,460	10,000	150ml*
68,190	15,000	225ml

*Monthly dose rate per 10,000 gallons or 37m² of surface area.

Blue Horizons Solar Shield can be used with all types of sanitiser.

For best results, angle inlets (returns) downward to decrease water surface movement. Solar Shield is most effective in still water.

Note: Do not store Blue Horizons Solar Shield at temperatures below 4°C (40°F)
